

# Batch Displacement Cooking & Retrofit Solution for Existing Indian Pulp Mills

\* **Craig A Bianchini PE PMP**

\*\* **Manoj K Azad**

There is a big need to improve the old cooking system in terms of efficiency & fiber strength. The conventional batch digestors and RDH systems can be upgraded to DDS (Displacement Digester System). This leap can be taken in 2 steps. The 1<sup>st</sup> one is called DSS Digester Steam Saving System & then to complete DDS.
